## Profile

---

Dynamic and results-oriented Web Developer with a fervent dedication to creating innovative and user-centric digital solutions. I specialize in crafting responsive websites and web applications, adept in front-end technologies. Proficiency across various programming languages, frameworks, and libraries enables me to thrive in collaborative settings, where creativity and problem-solving are paramount. I ensure the delivery of top-notch solutions that surpass client expectations, driven by a meticulous attention to detail.

## Projects

---

### Text Analyzer Using React.js

The Text Analyzer Using React.js project is a web application designed to analyze text input provided by the user. Built with the React.js library, this project offers a user-friendly interface where users can input text and obtain various analyses of the text content.

### Food Delivery Home Page Using HTML & CSS

The Food Delivery Home Page project is aimed at creating an attractive and functional web page for a food delivery service. Utilizing HTML for structure and CSS for styling, this project focuses on delivering a user-friendly interface that allows visitors to easily navigate through various food options, place orders, and learn more about the delivery service.

### Current Geo Location Detection Using JavaScript

"Current Geo Location Detection Using JavaScript" is a project aimed at leveraging JavaScript programming language to determine the precise geographical location of a user accessing a web application or website. Through the utilization of browser-based APIs such as the Geolocation API, the project aims to retrieve latitude and longitude coordinates representing the user's current position.
